

HYPERION X

HYPERION X

Explore the next Hyperion.

Hyperion X expands the Steelburner laser cutting family.

Explore the machine, its working area and the configuration suited to your production. Start with your workpiece geometry, dimensions and material requirements.

Proudly engineered, designed and manufactured in Europe.

HYPERION X

Process. Detail. Possibilities.

The Hyperion family

A new addition to the Steelburner laser cutting range, introduced in 2026.

The working area

A closer view of the machine layout and workpiece handling arrangement.

Your application

Discuss workpiece geometry, materials and the process configuration with our team.

Built around your application.

Define the process together with Steelburner.

Technology	Fiber laser cutting
Workpieces	Discuss geometry, dimensions and material range
Laser configuration	Select with the Steelburner team for your application
Technical data	Request the specification for your selected configuration
